

Regit's Sustainability Plan

Our philosophy

At Regit, cars and vans are everything to us. They're the cornerstone of what we do. But we're also very conscious of their impact on the environment, and we want to play a part in minimising or offsetting any negative impacts associated with them.

Introducing iOffset

We've partnered with iOffset to offer our users an easy route to **offsetting their carbon footprint** for their vehicles. They can offset their entire lifestyle too!

Offsetting via Regit and iOffset supports **high impact carbon projects around the world**, verified by Verra, Gold Standard and The United Nations. iOffset will plant a tree for every tonne that's offset.

iOffset projects.

PARÁ, BRAZIL

Portel Para REDD+ Project

The Project's main objective is to avoid and prevent unplanned deforestation in native forests.

KATINGAN MENTAYA, INDONESIA

Katingan REDD+ Project

The Katingan Mentaya Project is living proof that carbon finance can combat climate change.

INTERNATIONAL

Eden Reforestation Projects

Eden Reforestation Projects reduces extreme poverty and restores healthy forests by employing local villagers to plant millions of trees every year.

BRITISH COLUMBIA, CANADA

The Great Bear Forest Carbon Project

Corporate Initiatives

Commuting

Our team are offered hybrid working, reducing our overall commuting miles by ~40%

We also offer an EV salary sacrifice scheme to all employees, encouraging the switch to electric vehicles by making them more affordable, and our Alderley Park base has multiple charging points

But we do still commute, and we use our cars for personal travel, too. So Regit pays to offset the entire mileage of every employee's car, whether privately owned or a company car. We do this through our partner, iOffset, which funds projects that offset our carbon footprint

Corporate Initiatives

Environmental Projects

We earn a commission from our partners when our users offset their emissions via our website, but we're not doing it for commercial reasons

Every penny that we receive in commission is invested in environmental projects on the Alderley Park estate, the location of our head office

Influencing our users

With our unique content and tools, we want to **increase our users' awareness** of the impact their vehicles have on the environment and **help them do something positive** about it

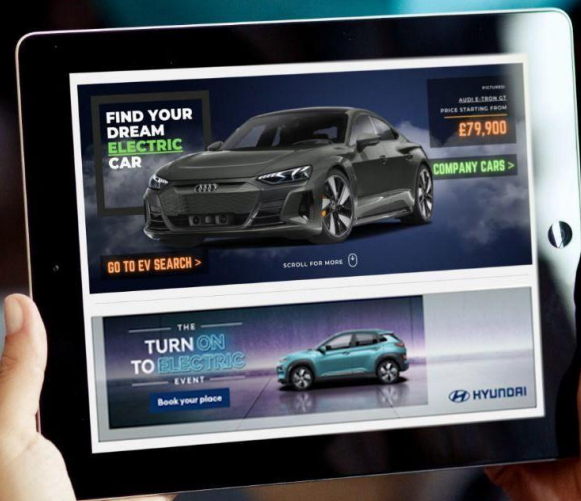

Our **EV Hub** provides **information and education** to break down barriers and encourage the switch to electric vehicles, removing carbon emissions at point of use
